

Week 1: Introducing SAP Cloud Application Programming Model

## **Unit 4: Your First App Using Node.js with SAP Cloud Application Programming Model**

# Your First App Using Node.js with SAP Cloud Application Programming Model

## Node.js for business service development

### Node.js

- Asynchronous event-driven JavaScript runtime
- Built on top of Chrome's V8 engine
- One language for front and back-end development

## Demo Scenario

You will build a Node.js application – a **Bookshop**.  
Its data model consists of

- Books
- Authors
- Orders

## What you've learned in this unit

- How to create a Node.js application using the SAP Cloud Application Programming Model
- How to run a service with the CDS command line tool
- Recommended path for (local) development using SQLite and "cds watch"

# Your First App Using Node.js with SAP Cloud Application Programming Model
